# Highlights

## Warm white light (2700K)

Light can have different color temperatures, indicated in units called Kelvin (K). Bulbs with a low Kelvin value produce a warm, more cozy light, while those with a higher Kelvin value produce a cool, more energizing light.

## Perfect shape to replace NR50

With its beautifully shaped design and familiar dimensions, this LED reflector is the perfect sustainable replacement for a traditional NR50 incandescent bulb.

## High color rendering (CRI>80)

The color rendering index (CRI) is used to describe the effect of a light source on color appearance. Natural outdoor light has a CRI of

100 and is used as the standard of comparison for any other light source. The CRI of Philips LED light bulbs is always higher than 80, close to the sun's value, reflecting colors truly and naturally.

## Very low energy consumption

By replacing traditional light bulbs with a Philips LED alternative, you will gain immediate, significant energy savings while contributing to a sustainable planet.

## Lasts up to 20 years

With a lifetime of up to 20,000 hours, this Philips LED lamp will ensure your desired atmosphere for up to 20 years.\*

## 36° halogen light beam

With a familiar focused light output, equal in look and feel to Halogen reflectors, this LED reflector light bulb is suitable for both accent lighting and general purpose lighting.

## Smooth surface

Shaped in a familiar way, this LED reflector offers all of the most recent innovations while maintaining the look and feel of a traditional bulb.

## Dimmable

Designed to provide quality dimming to create the right ambience for any activity, from relaxed to active atmospheres.
